

## Communication and quality service are paramount

**L**andmark Homes company owner Aaron Shirriffs has been involved with the contracting and projects industry in Manawatu for his entire working career. Priding himself on ensuring that clients are communicated with and given the best service possible has led to long working

relationships with many local people over the years.

Aaron is looking forward to bringing this same work ethic and outlook to his dealings with all new and existing Diamond Homes customers. As the company's sales manager, Aaron will be one of the first points of contact for many customers and he is well

equipped to ensure that each new home owner is given the tailored service that they come to his companies for.

Fellow owner and dedicated construction manager Ryan Coombes has spent his entire life being a dynamic part of the local housing construction industry. His reputation for hard work is well known throughout the area, as are his standards of organisation that are consistently high. As the construction manager for all Landmark Home builds, Ryan ensures that the process is as seamless as possible for the client, minimising and rectifying any potential headaches long before they may appear.

The establishment of a new

Diamond and/or Landmark home should be an enjoyable and positively memorable experience for new home owners - and it's Ryan's prime focus to make sure that this goal is achieved in a pleasurable fashion.

Alongside Aaron and Ryan is Shane Turnbull - Landmark Homes' new home consultant. With a firm born-and-bred history in the Manawatu, Shane will be the first port of call for most new Landmark clients. He is famously approachable, cheerful and an

all round enjoyable conversationalist. Customers love their chats with Shane and are always left with full assurance that their new home's needs are being met - both in design satisfaction, service quality and cost effectiveness.

Joining this vibrant team, as their new in-house

Architectural Designer, is Monica Bright - somebody who Diamond Home's customers will already be very familiar with! Monica has been designing stunning Diamond Homes for 13 years and is thoroughly looking forward to not only bringing that experience across, but also the new exciting opportunity

to put together custom Landmark design-and-build projects.

Monica is a qualified Architectural Designer, long time member of Architectural

Designers New Zealand, and a team member who is very experienced in all facets of design, construction and council requirements. She

prides herself on ensuring that Diamond (and now Landmark!) clients obtain the ideal new home design for the optimum in effective pricing - certainly an ideal addition to the growing Landmark Homes team!

Diamond Homes, previously on the corner of Main and Ruahine Streets, has now relocated to the Landmark

showroom on the corner of Broadway and Princess Streets. So if you are looking to build your own Landmark or would like to inquire about what Landmark homes now has to offer, they are only a phone call away (0800 477 110); or feel free to pop into the offices on Broadway for a chat anytime.

**Landmark Homes owners Aaron Shirriffs and Ryan Coombes are now the proud owners of Diamond Homes.**
